

What it is?

A technical competition for students in the field of **autonomous driving**, on model cars at **1:10 scale**, mimicking **real-driving scenarios**.

What background do you need?

The more **expertise in the team**, the better. Some of the covered topics in the project are: Computer vision, Vehicle control, Hardware design, Software design, Python coding, Parallel computing and many more!

What's there to gain?

- General overview in the field of autonomous driving
- Interaction with Bosch experts during the entire competition
- Attractive prizes
- Internship opportunities

present

Bosch Future
Mobility Challenge

What needs to be developed?

The **minimal features** are the following:

- Lane keeping and intersection navigation.
- Recognition and reaction to road elements (e.g.: signs)
- Reacting to road participants (e.g.: cars and pedestrians)
- Geo-localization based components (e.g.: dynamic driving)
- Other driving scenarios.

What's provided?

- Fully working model vehicle
- Firmware for car control and APIs for shared systems interaction
- Plenty of documentation, guidelines and code example
- Bosch mentorship

DO YOU WANT TO JOIN? HERE ARE THE STEPS!

BUILD a team

3 to 5 members
and a university mentor.

Did you get in?

Meet us for an interview
and wait for the result!
1st-11th of November 2022

Develop your solution

Write your code, integrate it,
test it, then start over!
15th of November 2022 → 5th
of May 2023

Competition finals

Come to Cluj-Napoca, Romania
and prove that your team is the
best!
10th – 15th of May 2023

Register

Have the team-leader
register the team on the
competition website
1st – 31st of October 2022

Let's get started!

Get your car and participate
at the kick-off!
15th of November 2022

Qualify for the event

Stand out and qualify for the
finals!
12th of March 2023
